# ACADRIX / STUDY NOTE

## Rotational Motion — Quick Revision

Angular momentum: $L = I\omega$

Torque: $\tau = I\alpha$

Rolling without slipping: $v = R\omega$

Focus prompt: connect the equation to a free-body diagram.

# ACADRIX / STUDY NOTE

## Rotational Motion — Quick Revision

Angular momentum: $L = I\omega$

Torque: $\tau = I\alpha$

Rolling without slipping: $v = R\omega$

Focus prompt: connect the equation to a free-body diagram.
